

FAASTeam presents:

Leesburg Safety Seminar with Rich Stowell

At this event you will learn about stall/spin accidents, emergency maneuver training, control surface failures, forced landings, and unusual attitudes. Find out what you need to know to avoid stall/spin accident scenarios. The discussion will then broaden to emergency maneuver training with a review of the differences between stalls, spirals and spins as well as avoiding wake turbulence. Learn how to maximize the probability of surviving a forced landing, cope with control surface failures and the critical sequence of events needed to recover from various unusual attitudes. ** If interested in flying with Rich Stowell on Friday (10/9), Saturday (10/10), or Sunday (10/11) please contact Robyn Goldstein at (703) 779-8787, or e-mail to jyo-operations@atlantic-airways.com. Click on the link below and register TODAY.

Directions: The meeting will be held in the Leesburg Executive Airport terminal lobby.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
